ROSBORO® KD TIMBERS

ENGINEERED, KILN-DRIED, AND PRECISION-MANUFACTURED

Each piece is graded and assigned the same structural design values as solid sawn timbers.

DIRECT SUBSTITUTE WITHOUT RE-ENGINEERING

- Straighter, lighter, and more stable
- Easier to handle and install
- More consistent and reliable
- More sustainable

FUTURE OF TIMBER CONSTRUCTION

S4S, square-edge, PLIB-certified, double-end trimmed, sealed, and protected for delivery for immediate shipment to the job site.

We believe Rosboro Timbers represent the future of timber construction — bringing together the beauty of wood with the performance and reliability of modern engineering.

ROSBORO KD TIMBERS (RT)

Strong, Straighter, Lighter, and more Sustainable. Smarter.
Structural (Certified) Glued Lumber (CGL)

The Better Timber Choice

Rosboro KD (Kiln-Dried) Timbers deliver high performance, sustainability and reliability. Engineered for today's structural demands while protecting tomorrow's forests. Rosboro Timbers (RT) are engineered to perform like solid sawn timbers, **only better**. Each piece is sized, graded, and assigned the same structural values as solid sawn lumber or timbers of the same species and visual grade, all in conformance with current Voluntary Product Standards.

Performance & Quality

- Engineered to meet the published design values of solid sawn timbers.
- Considered 100% FOHC Equivalent (Free of Heart Center).
- PLIB grade stamped on both ends for full traceability, double end trimmed, ends sealed and paper wrapped for clean, protected delivery.
- Laminations are proof loaded and visually graded for predictable structural performance.

Key Benefits

- **Cost Effective** – Competitive pricing compared to solid sawn timbers.
- **Solid Sawn Sizes** – Matches standard KD Timber dimensions.
- **S4S, Square Edge** – Superior dimensional stability.
- **Straight & Stable** – Kiln dried for consistent performance.
- **Direct Substitute** – Use in place of solid sawn timbers without reengineering.
- **Sustainable** – Manufactured using smaller, faster growing trees.
- **Lighter** – Up to 30% lighter, lower transportation costs. Easier handling.

Rosboro Timbers Deliver

- ✓ Sustainable sourcing
- ✓ Engineered, reliable strength
- ✓ Superior dimensional stability
- ✓ Reduced waste and variability
- ✓ Jobsite efficiency and cost savings
